Only efko can do!

Welcome to the largest manufacturer of Moravian Gherkins!

Moravian Cucumbers.

Similarly to Austria, where the vegetables for processing grow in Eferding near the Danube, in our republic cucumbers grow in the fertile heart of Southern Moravia.

The fruits of our land.

Cucumbers, white and red cabbage, beetroots, potatoes and apples flourish in Southern Moravia. And efko makes superb preserves from them all.

The home of efko.

It comes as no surprise that patiently built relationships with suppliers and customers and our commitment to quality and the latest technology make efko cz the largest producer of Moravian cucumbers. But efko is more than just cucumbers!

Only efko can do!

History efko

You can only make history when you have a long history behind you.

- 1941** A group of visionary farmers founded the Eferding Agricultural Cooperative – the predecessor of today's efko.
- 1950** Fresh fruit and vegetables were preserved with natural means for the first time – the legendary efko gherkins are launched on the market.
- 1960/70** In the 1960s and 70s, the product range was continuously expanded and true pickled vegetable classics were created.
- 1980** Production methods were continuously improved and great new products with ever more sophisticated recipes followed. In 1983, efko launched its now classic fine mayonnaise salads.
- 1992** The company efko s.r.o. was founded in the Czech and Slovak Federal Republic. the Czech and Slovak Federal Republic.
- 1997** efko cz s.r.o. started to build a brand new modernly equipped factory in Veselí nad Lužnicí.
- 2008/22** The construction of new storage capacity in the area of the factory. Gradually completely modified, enlarged and robotized production technologies, labeling and packaging lines.
- Today** Today, the efko group processes and produces the finest preserves from some 70 fruit and vegetable varieties. More than 85,000 tons of raw material are made into the finest preserves every year, which makes efko one of the most important pickled vegetable producers in Europe.

Still unique,
as well as once.
